To Whom It May Concern:

As a customer of XM Sattellite Radio, I wish to express to you the enjoyment I receive from using/paying for this service. I find that the local traffic/weather very useful as I can access it anytime of the day or night. It is there for my convenience as a PAYING customer. I feel it is my right and the right of free speech. I don't listen to local radio, because I don't want to have to listen to non stop chatter or advertisemnents. Is this really any different from cable tv and sattelite tv?
